

Scholarship available

A SIGNIFICANT education opportunity is being offered by Chevalier College in the Southern Highlands.

Scholarship funding is now available to a student wishing to commence Year 11 studies in Primary Industries towards a Certificate Two in Agriculture.

Applicants must be students new to the College and be prepared to start Year 11 studies in 2015. They will have access to great facilities in the new \$2 million Highlands Trade Skills Centre currently being constructed at Chev next to its working farm.

More than one part-scholarship may be offered depending on financial needs of the applicant students and their families.

The Highlands Trade Skills Centre is being

funded by a \$1.5M grant by the Federal Government. It is the only Trade Skills Centre to receive Federal funding in the Southern Highlands region. The Primary Industries TSC will have a classroom, a livestock theatre with tiered seating, holding pens and will adjoin the College's 14 hectare working farm with fenced yards, tractor, livestock and other agricultural structures.

Chevalier College has committing to fund the remaining \$500,000 needed for the building and equipment, but is seeking community and business support to help meet that obligation.

Chevalier College is offering to

work with TAFE, private training organisations and other high schools to provide broader access to the new facilities. The new centre will provide up-to-date, custom designed teaching facilities in both Primary Industries and Construction. The College has also invested heavily in commercial cooking kitchens to offer hospitality training courses.

Contact Chevalier College now on 4861 0524 for information on how to apply.
